SeaTwirl invites to a digital company presentation and Q&A

SeaTwirl AB (publ) invites existing and prospective shareholders to a digital company presentation followed by a Q&A session. CEO Johan Sandberg will present the company's journey from technology development to commercialisation and how the ongoing rights issue of approximately SEK 28.0 million will help the company take the next step.

SeaTwirl develops floating wind turbines for deeper waters and runs its business along two parallel tracks: the S200, a 200 kW turbine for offshore facilities without grid connection, such as fish farms, and a 2 MW-scale turbine to be demonstrated within the EU-funded VERTI-GO project. During the presentation, Johan Sandberg will give an overview of SeaTwirl, the company's technology and its two business tracks.
