

Q2 – 2019

INTERIM FINANCIAL REPORT JANUARY-JUNE 2019

SECOND QUARTER

- Net sales for the second quarter amounted to kSEK 1,436 (215).
- Result after taxes amounted to kSEK -17,607 (-9,298).
- Earnings per share was SEK -0.92 (-0.49).
- The cash flow from operating activities after changes in working capital was kSEK -14,185 (-8,111).

SIX MONTHS PERIOD

- Net sales for the six months period amounted to kSEK 1,986 (298).
- Result after taxes amounted to kSEK -33,598 (-16,726).
- Earnings per share was SEK -1.76 (-0.88).
- The cash flow from operating activities after changes in working capital was kSEK -28,611 (-24,835).
- Cash and cash equivalents including short term deposits at the balance date amounted to kSEK 110.460 (161.092).

SIGNIFICANT EVENTS DURING THE SECOND QUARTER

- In April, object detection software for autonomous robots was released on the Acconeer website.
- In April, Acconeer received two additional orders from BEYD, worth USD 27,498 and USD 25,800 respectively.
- Acconeer AB held its Annual General Meeting on 9 April 2019. Bengt Adolfsson was elected as new Chairman of the Board.
- In May, Acconeer received order from Digi-Key, worth USD 15.000 and order from Restar, worth USD 12.900 USD.
- In June, a distribution agreement was signed with Taiwanese Chip Power Technology Corp.
- In June, Acconeer received order from BEYD, worth USD 12.900.
- At the end of June, distribution agreements were signed with Glyn Limited and CODICO GmbH.

SIGNIFICANT EVENTS AFTER THE END OF THE PERIOD

- In July, two orders from Digi-Key were received, worth USD 30,283 and USD 33,000.
- During July, a distribution agreement was signed with Japanese Restar Electronics Corporation.

COMMENTS FROM OUR CEO

During the second quarter, we doubled the number of distributors we work with and we now cover all major technology markets globally

A major focus during the second quarter of 2019 has been on expanding our network of distributors, which almost doubled. We signed an agreement with Glyn Ltd. for Australia and New Zealand, Codico GmbH for Europe, Chip Power Technology Corp. in Taiwan and after the quarter also Japanese Restar K.K. Now we have finalized building a distributor network that covers all the important technology markets in the world. This year we will probably not add more instead our full focus will be on doing the partners we have even more productive.

Sales continue to be well over two evaluation kits per day, we sold 249 kits in the second quarter, and we believe that with more distributors in more markets, we can increase this rate to more than three per day already this year. This is important work because the sale of evaluation kits is an important parameter to gauge at an early stage how great interest there is in the market for a product.

Our sensor has been available for mass production almost 15 months now. Within semiconductors, the time between product launch and customer launches is usually considered to be between 12 and 24 months. During the second quarter, we have seen a couple of customer launches in the focus areas parking sensors and level measurement in tanks. Sales to these customers are reflected in our sales to Digi-Key. The sale of our sensor has really taken off during the quarter, which is positive. During the second quarter, we sold more than 20,000 sensors, the corresponding figure for the first quarter was about 2,000. The use of these sensors is either in smaller customer launches or in larger prototype series. We expect to see further launches during the second half of 2019. The revenue trend during the quarter was in line with our expectations.

We have now established a level of costs that we believe to be suitable over the long term. We will maintain this until we see significant revenue increases.

During the first quarter, our A1 sensor became both EN certified for Europe and FCC certified for the US, and during the second quarter, the sensor was certified

in Japan and a Korean customer certified its product based on A1 in Korea. There is still a lot to do in the certification area and we will keep our customers updated on our progress in the documentation.

As announced in February, during the second quarter, we launched dielectric lenses that focus the radar signal and extend the range. During the third quarter, we plan to launch the world's first radar module, which can be operated for several years on only one coin cell battery. The reason why we through the IoT module XM122 can be the first coin cell battery operated radar depends on the unique low power consumption the A1 sensor has. Many customers have already shown great interest in this module.

A new initiative for the quarter is that we have updated our Investor Relation website to be bilingual, Swedish and English. The reason for this is that several international customers, as well as existing and potential shareholders, want to be able to follow Acconeer's development.

I continue to sense an immense interest in our product, and we are still receiving feedback that what we do is unique. The prime target for Acconeer is to take every opportunity to grow quickly - but in a controlled manner - in order to establish a leading position in our segment: ultra-low power radar for mobile devices.

Lund July 26th 2019

Lars Lindell, CEO Acconeer AB (publ)

SECOND QUARTER NET SALES AND RESULT

Net sales for the second quarter amounted to kSEK 1.436 (215). Compared to the previous quarter, the net sales have increased by 161%. Net sales relates to sales to customers via Digi-Key, BEYD, and other new distributors. Compared to the preceding quarter, sales are up with kSEK 886.

Compared to the second quarter last year, operating costs has increased by 49 percent, to kSEK 19,157 (12,827). The increase primarily relates to amortization of intangible assets initiated during the fourth quarter of 2018 and increased other external charges according to plan.

Capitalized development costs, patents and

equipment were depreciated to the amount of kSEK 2,879 (521) during the second quarter.

Operating results for the second quarter amounted to kSEK -17,607 (-9,312) and result after taxes amounted to kSEK -17,607 (-9,298). The lower result in comparison with the preceding year was mainly driven by the kSEK 2,356 increase in depreciation costs, the lack of capitalized work performed for own account which amounted to kSEK 3,300 and cost increases according to plan.

The number of full-time equivalent employees averaged 30 (24) during the period, 2 of whom were women (2).

INVESTMENTS, LIQUIDITY AND FINANCIAL POSITION

On 30 June 2019, the cumulative book value of balanced costs for development work amounted to kSEK 39,018 (42,588). This refers to development work related to the A1 product. No capitalization has occurred during the first six months period since product commercialization is now underway.

The corresponding patent portfolio value amounted to kSEK 1,583 (1,202), most of which is due to investments in patents and patent applications related to the A1 product. Acconeer holds seven patent families, including 13 granted patents and 14 patent applications. The patent portfolio covers a range of geographies, including the USA, Europe, Japan and China.

Investments in fixed tangible assets has been financed from the company's own resources, and amounted to kSEK 194 (76).

Older incentive programs have been partly used in June 2019. Overall, options have been converted to 159,000 shares and kSEK 2,346 have been paid for these.

The subsidiary Acconeer Incentive AB has received one unconditional owner's contribution of TSEK 1,350 to handle new warrant program for employees. In June 300,000 warrants have been subscribed and TSEK 705 have been paid for these.

In fact that the Group is small and not covered by requirements for consolidated accounts no Group Accounts has been prepared.

The cash flow from operating activities during the first quarter amounted to kSEK -28,584 (15,684).

After changes in working capital, cash flow for the period amounted to kSEK -28,611 (-24,835).

At the balance sheet date, cash and cash equivalents including short-term deposits amounted to kSEK 110,460 (161,092).

Total equity amounted to kSEK 154,685 (206,511).

Equity ratio was 94 (96) percent.

SIX MONTHS PERIOD IN SUMMARY

Net sales for the six months period amounted to kSEK 1,986 (298). Net sales relate to sales to customers via Digi-Key, BEYD, and other new distributors.

Operating costs for the six months period has increased by 51 percent, to kSEK 35,734 (23,677).

The increase is mainly related to amortization of intangible assets which began in the fourth quarter of 2018 and increased other external costs according to plan.

Depreciation of capitalized development costs,

patents and inventories were made during the first half of the year with 5,753 (1,041) TSEK.

Operating results for the six months period amounted to kSEK -33,621 (-16,727) and result after taxes amounted to kSEK -33,598 (-16,726). The lower result in comparison with the preceding year was mainly driven by the kSEK 4,711 increase in depreciation costs, the lack of capitalized work performed for own account which amounted to kSEK 6,600 and cost increases according to plan.

SIGNIFICANT EVENTS DURING THE FIRST SIX MONTHS PERIOD

JANUARY - MARCH

In January, Acconeer received a USD 22,450 order from BEYD, which included Acconeer's A1 sensor and the XC112 and XR112 evaluation kits. Acconeer has cooperated with BEYD on the Chinese market since July 2018.

In early February, the company announced a planned launch of dielectric lenses during the second quarter of 2019. Acconeer has for some time evaluated dielectric lenses as a complement to its radar sensor. The purpose is to focus the radar signal and increase range. As a result of this work, Acconeer planned to introduce two kinds of lenses for Digi-Key distribution during the second quarter of 2019.

In December 2018, Acconeer launched its first module for Digi-Key distribution - the XM112. It was very well received and the company is planning to launch an IoT module during the third quarter of 2019. This was announced in February.

During the first quarter 2019, Acconeer sold 224 evaluation kits.

APRIL - JUNE

In April, the company announced object detection software for autonomous robots was released on the Acconeer website. In order to create simpler and faster development processes for customers publish Acconeers current downloadable detectors with accompanying demonstration videos. Customers can thereby, without delay, downloading the detector directly from Acconeer's website and initiate sensor tests. The detector delivers data that enables it customers to further develop the functionality at the application level and put their mark on the product.

In April, Acconeer received two additional orders from BEYD, worth USD 27,498 and USD 25,800 respectively. The new orders from BEYD includes

two of Acconeer's products, the sensor A1 and the coupling board XB112.

In May, orders from Digi-Key received USD 15,000 and orders from Restar worth USD 12,900.

In June, distribution agreements were signed with Taiwanese Chip Power Technology Corp., a leading company distributor in Taiwan. Initially, the agreement refers to the sensor A1, modules and evaluation kit and cover it Taiwanese market.

In June, additional orders were received from BEYD worth USD 12,900.

At the end of June, distribution agreements have been signed with New Zealand Glyn Ltd, a leading distributor in New Zealand and Australia. Initially, the agreement refers to the radar sensor A1, modules and evaluation kits and covers both the New Zealand and Australian markets.

A Pan-European distribution agreement has also been signed at the end of June, with CODICO GmbH. CODICO is a leading European distributor with headquarters in Vienna, Austria. Initially, the agreement refers to the radar sensor A1, modules and evaluation kits and covers in addition the European market also the Middle East and Africa.

During the second quarter 2019, Acconeer sold 249 evaluation kits.

SIGNIFICANT EVENTS AFTER THE END OF THE PERIOD

In July, two orders from Digi-Key were received, worth USD 30,283 and USD 33,000.

During July, a distribution agreement was signed with Japanese Restar Electronics Corporation, a Japanese distributor with a particularly strong

position among companies operating in the consumer electronics segment. Initially, the agreement concerns the radar sensor A1 and evaluation kit and covers the Japanese market.

ANNUAL GENERAL MEETING

Acconeer AB held its Annual General Meeting in Lund on Tuesday, 9 April 2019.

The General Meeting decided to re-elect Board members Bengt Adolfsson, Lars-Erik Wernersson, Git Sturesjö Adolfsson and Thomas Rex, and to elect Johan Paulsson as new Board member. Bengt Adolfsson was elected as Chairman of the Board. Bo Ekelund and Magnus Wide declined re-election.

The General Meeting resolved to approve the proposal that a total director's fee of 12 times the price base amount shall be paid, with four (4) times the price base amount going to the Chairman and two (2) times the price base amount going to each of the other Board members elected by the AGM and not employed by the company, and that remuneration to the auditor shall be paid according to approved invoice.

The Meeting resolved in accordance with the Board's proposal to establish an incentive scheme

("Warrant programme 2019/2022") with (A) an issue of Series 2019/2022 warrants with deviation from the share holders' preferential rights to Acconeer Incentive AB, and (B) approval of transfer of warrants to the employees. The programme means that no more than 600,000 warrants shall be issued to Acconeer's wholly-owned subsidiary Acconeer Incentive AB, in order to subsequently be transferred to the company's employees. Transfer will take place in part on 1 May 2019 and in part on 1 November 2019, according to the market value at the time of transfer, and allotment shall be executed according to the principles set out in the Board's proposal. The maximum dilution from the programme is 2,96 percent.

The Meeting resolved to elect the audit firm Öhrlings PricewaterhouseCoopers AB as the company's auditor, with chartered accountant Ola Bjärehäll as responsible auditor.

ACCOUNTING AND VALUATION POLICIES

This interim financial report is prepared in accordance with the Swedish Annual Accounts Act as well as the Swedish Accounting Standards Board BFNAR 2012:1 annual report and consolidated (K3).

More information about the company's accounting policies can be found in the 2018 annual report, on pages 26-28. The accounting policies are the same.

Regarding accounting principles for revenue,

revenue is recognized when it can be reliably calculated and when the financial benefits arising from it likely will be available to the company.

Amounts expressed in kSEK and MSEK in this interim report refer to thousands and millions of Swedish kronor, respectively. Numbers within parentheses refer to values from the corresponding period in the preceding year.

KEY RISKS AND UNCERTAINTY FACTORS

A description of Acconeer's key risks and uncertainty factors can be found in the 2018 annual report, on page 20, and in the 2017 listing prospectus, on pages 8-9. No significant changes have taken place since then

UPCOMING FINANCIAL INFORMATION

Interim Report Jan-Sep 2019	25 October 2019
Year End report 2019	20 February 2020

SHARE PERFORMANCE

The IPO lockup that covered approximately 70 percent of Acconeer's shares expired in December 2018. The rising supply of shares had a downward effect on the share price for the rest of the year. Since the beginning of the year, the share has bounced back somewhat but still trades below the IPO price of SEK 25.

At the beginning of 2018, the number of shares in Acconeer amounted to 19,079,500 shares. At the Annual General Meeting on May 21, 2015, a decision was made about an incentive program that was partly used during June 2019. Overall, options have been converted to 159,000 shares. At the end of June 2019, the total number of shares amounted to 19,238,500 shares.

AUDITORS' REVIEW

This report has not been reviewed by the company's auditors.

*DEFINITIONS OF INDICATORS

Earnings per share = Net income after taxes divided by the average number of shares during the period.

Cash flow per share = Cash flow from operating activities during the period, divided by the average number of shares during the period.

Solidity = Total equity on the balance sheet date, divided by the balance sheet total on the balance sheet date.

Equity per share = Equity on the balance sheet date divided by the number of shares on the balance sheet date.

ACCONEER IN BRIEF

Based on research from Lund University, Acconeer has created a radar sensor that combines the best of existing radar technologies and creates new opportunities for human interaction with technology. The radar sensor is able to combine the low power consumption of a pulsed system with the high accuracy of a coherent radar in a 5x5 mm component. The Acconeer radar is the first one with the proper size, power consumption and price for consumer electronics use. A radar sensor with these characteristics creates endless possibilities:

Millimeter-precision distance measurement enables applications such as fuel level measurements and robust parking sensors.

Object positioning allows, for example, presence detection and precise control of robots and tools.

By tracking movement, the sensor can provide the means for gesture control, vibration metering, and breathing or pulse rate monitoring.

Robot vacuum cleaners and lawn movers can make use of the material classification properties to determine the current surface type.

A LARGE AND GROWING MARKET

Based on key industry trends, Acconeer's market, 3D sensing, is expected to keep growing rapidly. The prevalent technologies today involve ultrasound, IR or cameras. Instead of having to build a new market, Acconeer can replace these existing solutions, which all have weaknesses. The most interesting domains are:

**ROBOTS AND
DRONES**

WEARABLES
(mobile phones,
watches, etc.)

**INTERNET OF
THINGS**
(IoT)

**POWER TOOLS &
INDUSTRIAL**

**HEALTHCARE &
FITNESS**

AUTOMOTIVE

New applications that require more sophisticated sensors for gesture control, 3D imaging and material recognition are being intensively developed in all of these areas. The potential impact of technology on our everyday life just a few years from now seems boundless.

PROMISING AND ATTRACTIVE GROWTH AND RETURNS

Acconeer's first product has now entered mass production. Our present focus is to increase sales. The use of Acconeer sensors in large-volume consumer products will generate a profitable business operation.

THE HEADQUARTERS IN LUND, AND THE EXPERIENCED MANAGING BODY

Acconeer has a competent and experienced managing body and board. The company is directed by CEO Lars Lindell, with a mobile industry background encompassing startups as well as large international companies. Co-founders Mats Ärlelid and Mikael Egard are responsible for developing the new radar technology, and are co-inventors of several of the patents.

LISTED ON FIRST NORTH

The Acconeer share is listed on First North, Stockholm, since 11 December 2017.
