

KlaraBo joins LFM30

KlaraBo is joining LFM30, Malmö's local roadmap for a climate-neutral construction sector by 2030 at the latest, consisting of six strategic focus areas each with detailed targets. The initiative is in line with KlaraBo's target to achieve climate-neutral properties by 2030 at the latest.

An important aspect of LFM30 concerns collaboration between the industry's players and the exchange of experience from construction projects. In the spring, KlaraBo, together with OBOS, won an acclaimed land allocation competition in Hyllie with the Boostad project proposal. The project was characterised by ecological and social sustainability with low rent and operating costs. Features such as rooftop solar panels enable a joint energy solution that includes production, storage and sharing of energy between properties.

"It feels very positive to be able to announce this news. LFM30 will open up a valuable exchange of experience with other players, and the project in Hyllie provides us with a great opportunity to contribute to Malmö's ambition to continue to grow sustainably. Together with other players, we can drive developments in a positive direction while also making our offering even more attractive for our tenants", says Kristin Lundmark, Sustainability Manager at KlaraBo.

LFM30 unites builders, property owners, architects, technology consultants and material manufacturers. Several banks, research institutes and energy companies are also connected to the organisation. In total, over 350 different players have joined.

About KlaraBo

KlaraBo is a real estate company that acquires, builds, owns and manages attractive residential properties. The company was founded in 2017 and operates throughout the country. The strategy is to acquire existing residential properties as well as land for new construction in regions with population growth and a strong labour market. Our newly constructed apartments are developed in-house and space efficient, which contribute to reasonable rents. Both apartments and buildings are designed in collaboration with the municipality to fit local needs. With wood as the main building material, the new construction holds a high environmental standard. KlaraBo is a long-term property owner. KlaraBo is listed on Nasdaq Stockholm and is traded under the ticker KLARA B.
