

## AAC Clyde Space receives follow-on order for Europe's new weather satellites – MetOp-SG

2022-05-20 AAC Clyde Space AB (publ)

Leading New Space company AAC Clyde Space's subsidiary Omnisys has secured an EUR 0.47 M (approx. SEK 4.9 M) order to deliver strategic spare parts to Airbus Defence and Space for Europe's next generation of meteorological satellites, the MetOp-SG.

The order follows a contract in 2015 between AAC Omnisys and Airbus Defence and Space in Toulouse, France, where AAC Omnisys delivered three sets of flight components, one qualification model and one spare model. From a space segment perspective, MetOp-SG is two series of satellites (Satellite-A and Satellite-B) with three satellites. The three MetOp-SG satellite-B will be launched seven years apart, starting in 2024. The spare components that Omnisys will deliver are related to 118 GHz receivers as part of a MicroWave Imaging radiometer (MWI) being built by Airbus Defence and Space in Toulouse and flying on all three satellites B. The MWIs will provide cloud and precipitation products and all-weather surface imagery to support numerical weather prediction at regional and global scales.

The components are spare parts for the satellites planned to launch in 2024, 2031 and 2038. AAC Omnisys will keep the spare parts on its premises for five years, regularly testing them to ensure that they are operational. Critical front-end components have been developed together with prof. Stake's research group at the Terahertz and Millimetre Wave Laboratory and produced in the Nanofabrication Laboratory at the Chalmers University of Technology in Gothenburg, Sweden.

*"AAC Omnisys continues to build on its strong position in technology for weather satellite missions of all sizes. As part of the MetOp program, Omnisys contributes to ensure top quality meteorological data from this European flagship mission," says AAC Clyde Space's CEO Luis Gomes.*

### ABOUT AAC CLYDE SPACE

AAC Clyde Space specialises in small satellite technologies and services that enable businesses, governments and educational organisations to access high-quality, timely data from space. Its growing capabilities bring together three divisions:

**Space Data as a Service** – delivering data from space directly to customers

**Space missions** – turnkey solutions that empower customers to streamline their space missions

**Space products and components** – a full range of off-the-shelf and tailor-made subsystems, components and sensors

AAC Clyde Space aims to become a world leader in commercial small satellites and services from space, applying advances in its technology to tackle global challenges and improve our life on Earth.

The Group's main operations are located in Sweden, the United Kingdom, the Netherlands, South Africa and the USA, with partner networks in Japan and South Korea.

AAC Clyde Space's shares are traded on Nasdaq First North Premier Growth Market. Erik Penser Bank AB, e-mail [certifiedadviser@penser.se](mailto:certifiedadviser@penser.se), telephone +46 8 463 83 00, is the Certified Adviser. The share is also traded on the US OTCQX-market under the symbol ACCMF.
