Press release

Safestate Group AB (publ): SafeState Partners with AE server to Protect Tens of Thousands of UAE Businesses

Safestate Group AB (publ): SafeState Partners with AE server to Protect Tens of Thousands of UAE Businesses

Dark Web Monitoring set to roll out across AE server's customer base as SafeState cements its position as the go-to cyber partner for the hosting industry.

AEserver, the UAE's largest domain registrar and hosting provider, has chosen SafeState to bring dark web monitoring to its tens of thousands of business customers across the UAE and wider Middle East.

The partnership is the latest in a wave of hosting industry wins since SafeState's launch in February 2026. In just a few months, the company has established itself as the default cybersecurity and value-added product partner for key players in the hosting vertical, and AEserver is one of the most significant yet.

Daan Donders CEO of SafeState: *"AEserver has been building trust with UAE businesses for over 20 years, that's exactly the kind of partner we look for. We bring the product, the hosting expertise, and a GTM model built for scale. AEserver's customers get real protection, and AEserver gets a revenue stream that actually converts."*

SafeState's dark web monitoring continuously scans criminal marketplaces and breach databases, alerting businesses the moment their data is found exposed, before it can be used against them.

Cyber protection shouldn't be hard to access. SafeState and AEserver are making sure it isn't.
