JonDeTech receives a second design win and a new order regarding JIRS40 from Chinese Yoyon

JonDeTech has received another design win from Zhuhai Yaoyang Electronic Technology Co., Ltd (Yoyon), a leading Original Design Manufacturer (ODM) in the smart lock market. This design win is also intended for use in smart locks; however, by a different Tier 1 OEM than the previously announced design win. This is JonDeTech's second design win and order with the packaged sensor JIRS40. The order value is USD 54,000.

The design win is related to JIRS40 hardware and software components developed by JonDeTech.

Zhuhai Yoyon Electronic Technology Co., Ltd. is a Chinese high-tech enterprise with its headquarters in Zhuhai City in the Guangdong Province. The company vertically integrates biometric algorithms, chip development, sensor development, solution development, and production. They provide high-tech, low-cost fingerprint, face, finger vein, and voiceprint biometric solutions and products for various fields, such as smart locks, elections, bank security products, and smart building intercoms. And they occupy a considerable market share in these fields. They are also known for being China's electronic smart lock technology center.

- The fact that we have now successfully obtained two design wins and orders regarding JIRS40 in a short time shows that it is a competitive product and that our focus on presence detection is made precisely at the right time. As the portfolio is strengthened, we will see many more business opportunities, says Dean Totic, CEO JonDeTech.

JIRS40 is a packaged sensor product that was recently added to JonDeTech's offerings, it fits well into and complements the existing product portfolio. In addition to the sensor's good features regarding price and performance, it works very well with the company's patented software for presence detection (wake-on approach).

About JonDeTech

JonDeTech is a supplier of sensor technology. The company markets a portfolio of IR sensor elements based on proprietary nanotechnology and silicon MEMS. The nanoelements are extremely thin, built-in flexible plastic, and can be manufactured in high volumes at a low cost, which opens up for a variety of applications, such as temperature and heat flow measurements, presence detection, and gas detection. The company is listed on Nasdaq First North Growth Market. Redeye is the company's Certified Adviser.
