Raytelligence - initial order from Careteq, Australia

Raytelligence has received an initial order from Careteq, Australia, which operates in home care where the intention is to integrate EaZense into their offering.

<https://www.careteq.com.au/>

Order value approx. SEK 20,000.

Careteq is an Australian company with a focus on designing and commercializing technology products for "assisted-living" within global markets. That the company chooses to invest in EaZense as part of their portfolio is very exciting, says Klas Arvidson, CEO of Raytelligence.

"We are very excited to be collaborating with Raytelligence in this innovative and market leading technology. The EaZense system is complimentary to our existing intelligent framework. It will provide further granularity with real-time events and monitoring solutions to the aged in-care and homecare markets in Australia and New Zealand" says Peter Scala, Managing Director of Careteq.
