

PRESS RELEASE

Stockholm, 1 February 2024

Multisoft expands its product suite through the acquisition of the cloud-based software platform Workbuster

Multisoft strengthens its position within the employment agency segment through the acquisition of Grade Matcha AB ('Workbuster'), a carve-out of Grade's business area Matcha. Workbuster is the market leading software platform for Swedish private employment service agencies providing cloud-based support systems for work coaches when matching candidates with jobs or educational programs. With easy onboarding, customers can quickly get started with the service to secure delivery and revenue streams. The transaction closed on 31 January 2024.

'We are excited to bring Workbuster's team, product suite and capabilities onboard which is a valuable addition to strengthen Multisoft's position within the segment. Through the acquisition, Multisoft gains access to digital excellence in the field and can at the same time complement Workbuster's offer with tailored integrations and functions. We welcome the Workbuster team into the Multisoft culture where we focus on automation and customer satisfaction' says Emil Gyllenring, CEO at Multisoft.
