## **EEVIA HEALTH PLC RECEIVES A MSEK 1,8 (KUSD 169) SALES ORDER**

**Eevia Health ("Eevia" or "The Company") received a MSEK 1,849 / KUSD 169 blanket sales order for the elderberry extract FENO-SAMBUCUS™ 7 ORGANIC from a distributor in the US.**

The blanket order is from Select Ingredients, a San Diego, California, US distributor. Select Ingredients specializes in organic ingredients and high-quality natural plant extracts and serves branded customers in the Golden State and other large US states.

The end customer is a company in the whole foods and drinks segment that is experiencing fast growth across North America.

FENO-SAMBUCUS™ 7 ORGANIC is an elderberry extract with a standardized level of anthocyanins that complies with key monographs, such as the United States Pharmacopeia. However, due to Eevia's production and purification approach, the product contains more other polyphenols than comparable extracts, and it is documented in vivo that it has a better bioactivity performance as well. The product is known for its immune-modulating properties.

Select Ingredients will call on the blanket sales order in several "draws" over the next few months. The sales value in euros is KEUR 160 (KSEK 1,849) FCA Finland. This order is a repeat order from the end customers. Eevia expects further repeat orders in the future.

## INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients in dietary supplements and food brands globally, and these global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested sustainably.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. In June 2021, Eevia listed its shares on the Spotlight Stock Market in Sweden under the short name (ticker) [EEVIA](#).
