

News Release

Ranplan partners with Chongqing College of Electronic Engineering

Stockholm, Sweden, 18 August 2021 – Following a comprehensive evaluation in the last few months, Chongqing College of Electronic Engineering (CQCEE) - one of the leading technical institutions in China - has awarded Ranplan Wireless a contract worth around USD 140k (SEK 1.2 million) for the provision of software licenses, training and support over a three-year period. Deliveries of the software resulting in net sales are envisaged to take place in the second half of the 2021 calendar.

“We take considerable pride in our contribution and involvement in the advancement of using software simulation for educational purposes. As the realisation of the 5G vision enters its most exciting phase, spurred by the unleashing of a number of fascinating vertical applications calling for exceptional reliability, extra-low latency and extraordinary throughput, predictive analysis before and after the deployment of wireless networks will become increasingly indispensable. Our pedigree within academia, pioneering work within the art of HetNets and unsurpassed understanding of radio technology, telecom standards and software development make us an excellent partner to institutes of higher learning within our field of expertise. We seek to share our knowledge”, said Per Lindberg, CEO, Ranplan Group AB.

This information is information that Ranplan Group AB is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact person set below, on 18 August 2021, at 8:00am CET.

About Ranplan Wireless

Ranplan Wireless pioneers software solutions that help perfect the design, optimisation and automation of in-building and urban outdoor wireless networks,

either in isolation or in coordination. Our solutions enable an ecosystem of companies to deploy next generation wireless networks for a range of applications, supporting multiple technologies such as 4G LTE, 5G, Wi Fi, IoT, TETRA and P25, providing end users with an unmatched quality of experience.

Ranplan Wireless is a subsidiary of Ranplan Group AB (Nasdaq First North: RPLAN) whose head office is in Stockholm, Sweden. The group operates out of offices in the UK, USA and China. For further information, visit www.ranplanwireless.com
