

MedTech Company Places Order with HDT Valued at SEK 1.7 Million

Stockholm, October 27, 2026 – H&D Digital Twin Industries AB (HDT) has received a new order from a leading MedTech company. The order covers the delivery of IoT modules and is valued at approximately SEK 1.7 million.

The customer is a leading global supplier of digital X-ray detectors. It selected HDT's product in May 2023, and HDT has since supported the customer with customization and certification. Production began in 2023, and the customer's product is now ready for a broader market launch and full-scale production ramp-up.

The total sales value to HDT from projects expected to result from this customer relationship is conservatively estimated at more than SEK 4 million over a three-year period. The total value of orders received from the customer in 2026 is approximately SEK 2.2 million. The newly received order, valued at SEK 1.7 million, is scheduled for delivery in the third quarter of 2027 and is expected to contribute positively to cash flow during that period.
