

Wyld Networks receives purchase order of SEK 770,000 for delivering software for IoT devices in the utilities sector

Wyld Networks and a Nordic IoT company sign a contract for SEK 770,000 to deploy Wyld's TRIoT software stack for the utilities vertical in Europe.

Wyld's Nordic partner develops wireless communication solutions with multiple organizations and institutions to solve complex problems in large scale internet of things installations.

The ongoing partnership is based on Wyld's IoT software solutions and the unique wireless capabilities they enable. Initially, Wyld will solve connectivity challenges in utility metering.

"Wyld are pleased to announce the receipt of this purchase order for our device software," said Alastair Williamson, CEO of Wyld Networks. "...as we continue to develop and deploy IoT solutions to simplify data collection."
