JonDeTech and Chinese Green Motive Technology (GMT) entered into a cooperation agreement regarding the development of sensor solutions

JonDeTech and Chinese Shanghai Green Motive Smart Technology Co., Ltd (GMT) have today signed an agreement regarding an in-depth and long-term commercial collaboration regarding the development of sensor solutions and related technology in home appliances and high-end equipment. The agreement covers JonDeTech's proprietary sensor element, JIRS30, and the silicon-based sensor, JIRS40. The agreement confirms the two companies' intention to work together to deliver new sensor solutions to China large customer base.

To, among other things, increase efficiency and pace of development as well as create the opportunity for customer demonstrations, JonDeTech will, free of charge, also have access to office space and postal addresses in GMT's offices in Shanghai, Shenzhen, and Qingdao. In addition, GMT also provides multiple workspaces and a dedicated office space at its headquarters in Shanghai.

- With this agreement, we take another big step towards commercializing our proprietary sensor element, JIRS30 and creating additional opportunities for JIRS40. One cannot help but be impressed by GMT's product portfolio, customers, and partners. I look forward to a long and fruitful collaboration, says Dean Tomic, CEO of JonDeTech.

- As all verticals have been becoming more AI-oriented, we are very happy to see this cooperation with JonDeTech at this time, especially when considering its proprietary and unique technologies in the sensing field. We foresee this cooperation will provide us with a good and unique sensing capability base and consequently enable us to develop more specific smart solutions for making the at-home/smart appliance market more intelligent. We welcome the JonDeTech team to join our development operation at our Shanghai facility soon, says Simon Sun, CTO at Green Motive.

About GMT

GMT is an intelligent solution provider of cloud-based control, interaction, connection, display and content operation as the core technology for smart appliances. They offer frequency conversion systems, cloud-based software, and apps with integrated BLE, WiFi and 5G modules for controlling cameras, multi-touch tables, washing machines, and connected appliances. The company provides comprehensive IoT solutions with cloud services, and customers and partners include Haier (including Candy), Whirlpool, Panasonic, BSH, Midea, Hisense (including Gorenje) and Xiaomi, among others.

In addition to smart home appliances, the company addresses smart sports products, smart travel products, smart homes, smart buildings, smart industry, and smart agriculture. This gives the company a position of directly working with Alibaba Group's IoT mega-data practice, acting as

one of data infrastructure partners and a part of IoT data service team. GMT's shares are listed on the Beijing Stock Market's OTC list NEEQ under the ticker code 835421 - Green Motive.

About JonDeTech

JonDeTech is a supplier of sensor technology. The company markets a portfolio of IR sensor elements based on proprietary nanotechnology and silicon MEMS. The nanoelements are extremely thin, built-in flexible plastic, and can be manufactured in high volumes at a low cost, which opens up for a variety of applications, such as temperature and heat flow measurements, presence detection, and gas detection. The company is listed on Nasdaq First North Growth Market. Redeye is the company's Certified Adviser. Read more at www.jondetech.se or see how the IR sensor works at www.youtube.com/watch?v=2vEc3dRsDq8.
