

PRESS RELEASE

10 September 2018

H & D Wireless becomes new members of Odette

Nasdaq First North-listed H&D Wireless, which develops and sells IoT modules and RTLS-positioning services (real time location service) to the manufacturing industry, becomes members of the cooperation body Odette Sweden, to contribute to the standardization of Industry 4.0 solutions in the automotive industry.

"The introduction of Odette standards already today results in optimization of transport, reduced capital tied to materials and less production stoppages and the introduction of Odette's standard for digital messages in GEPS™ tags enables the automotive industry real-time tracking of materials throughout the transport range - from supplier to factory delivery and all the way to assembly. Therefore, it is a combination that can generate big savings and thus increase the profitability of investment in digitization of the manufacturing industry," says Pär Bergsten, CEO and founder of H&D Wireless.

"We at Odette Sweden, welcomes H&D Wireless as a new member. We see great opportunities in combining our standard for material handling with real-time tracking from H&D Wireless and within GEPS and look forward to following their implementation work and test," says Ingrid Lundberg, CEO Odette.

Griffin Enterprise Positioning Service, GEPS™, is a technical platform and system for delivering services to position real-time physical objects in real-time with the ability to analyze and visualize the value chain digitized. GEPS is offered to a variety of segments and applications.

Odette Sweden is a member-financed cooperative body with Swedish vehicle manufacturers as key stakeholders. Through international cooperation, efforts are being made to establish common standards for vehicle manufacturers and its suppliers. See www.odette.org
