Upplands Väsby 16 mars 2022

Imsys AB: Interim Report for 3rd Quarter, 9 months in financial year 2021-22

- Launch of product programs for Artificial Intelligence AI and Internet of Things IoT
- Agreement of test chip with Alice technology during third quarter of 2022
- Relaunch of Imsys brand with new logo, graphic profile and website, www.imsys.ai

The third quarter of the financial year 1 November 2021 - 31 January 2022 marks a high pace in the business.

The company's cost development and results for the third quarter and first nine months for the financial year 2021-22, compared with the same period last year, indicate that the development teams have grown in line with planned expansion. Invoicing is still negatively affected by the pandemic.

For the third quarter of the financial year, Imsys reports the following results (compared with 3rd Quarter 2020-21) in Thousand SEK:

- Sales amounted to 11 KSEK (242 TSEK)
- Profit after financial items amounted to - 3,466 TSEK (- 3,150 TSEK)
- Investments in development work amounted to 2,921 TSEK (2,258 TSEK)
- The gross margin on product sales amounted to 62.5% (67.8%)
- Earnings in kronor per share amounted to - 0.22 (-0.23)

The complete Interim Report for 3 Quarter, 9 Months, is attached to this press release and is also available for download on the Company's website; www.imsys.ai, www.imsys.tech.ai
