EYE World AB (publ): EYE Responds Rapidly to Miljödata Data Leak – Database Updated Within 24 Hours

EYE World AB (publ): EYE Responds Rapidly to Miljödata Data Leak – Database Updated Within 24 Hours

EYE World AB (publ), the Nordic SaaS cybersecurity company, announces that the sensitive information exposed in the recent Miljödata breach in Sweden has been fully integrated into its monitoring database. The update was completed within just 24 hours of the data being published online.

This swift action ensures that EYE's customers immediately receive alerts if their personal information has been compromised, along with detailed insights into what data has been stolen. Among the leaked records are more than 1,000 individuals registered with Skyddade Personuppgifter (protected identities), underlining the severity of this breach.

"Our ability to detect, analyze, and upload compromised datasets within such a short timeframe demonstrates why our proactive model is essential in today's threat landscape. Speed matters when sensitive information is at risk," said Fredrik Björklund, CEO of EYE World AB.

EYE's advanced monitoring platform continuously scans global sources for leaked credentials and sensitive data. By integrating Miljödata's leaked information so quickly, the company reinforces its mission to provide real-time protection for both individuals and organizations across Sweden and internationally.
