EEVIA HEALTH PLC RECEIVES A 13K USD SALES ORDER FOR FENO-SAMBUCUS™ 7 ORGANIC

Eevia Health ("Eevia" or "The Company") received a 13K USD /12KEUR sales order for the elderberry extract FENO-SAMBUCUS™ 7 Organic.

The order is from Select Ingredients, a distributor located in California, US. The end customer is a brand owner that specializes in organic plant-based food supplements without sugars and artificial compounds. The end customer provides supplements skewed for the whole family. This is their first order for FENO-SAMBUCUS™ 7 Organic and they expected to place more repeat orders in the future.

Select Ingredients is one of Eevia's distributors in the US. Select is known for its specialization in organic-certified products and high-quality natural plant extracts. Select is headquartered in San Diego, California, and has a strong presence in the Golden State and other large states in the US.

The end customer chose Eevia due to its quality and ingredient profile. Eevia Health is currently the largest manufacturer of elderberry extract in the world. FENO-SAMBUCUS™ 7 Organic is a certified organic elderberry extract standardized at 7% anthocyanins. Eevia uses a special purification technology that purifies the product based on chemical class and not molecular size. This process leaves other important bioactive compounds present in the extract, such as oligomeric proanthocyanidins (OPCs), which provide a better nutritional profile than competitors.

INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients in dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name (ticker) [EEVIA](#).
