SeaTwirl AB to present at the Swedish business delegation to Canada

SeaTwirl is participating in the Swedish business delegation to Canada, 18–20 November 2025, held alongside the state visit by the Swedish royal couple. The company's partnership with Aks Wind has been selected as one of three national success stories to be presented to the delegation.

As the largest-ever Swedish business delegation to visit Canada, the visit aims to deepen trade relations, foster innovation, and accelerate industrial collaboration between the two countries.

Following a collaboration agreement signed in June, SeaTwirl and its Canadian partner Aks Wind are exploring floating offshore wind opportunities in British Columbia's deep waters.

The delegation will also take part in Sweden–Canada Innovation Days 2025, an invitation-only conference funded by Vinnova and the Swedish Energy Agency. SeaTwirl, selected as one of three success stories, will share its story at the event, with CEO Johan Sandberg presenting together with Aks Wind.

“Canada is a very promising market for SeaTwirl, with strong winds, deep waters, and a clear commitment to the green transition. Through our partnership with Aks Wind, we are well positioned to contribute to Canada's future energy mix, especially in British Columbia. We are grateful to Business Sweden for inviting us to present our story. It will be an honour to share it with royalty, ministers, and business leaders”, says Johan Sandberg, CEO of SeaTwirl.

About SeaTwirl

SeaTwirl AB is a Swedish energy-tech company within offshore wind power with the purpose to enable floating offshore wind - wherever it is needed. SeaTwirl's unique floating vertical-axis wind turbine has a low center of gravity, a slim substructure, and a generator house accessible at the sea surface enabling small, cost efficient, and locally available vessels to maintain it. The company is listed on Nasdaq First North Growth Market since 2016. Read more at:
