EYEON GROUP AB (publ): Safestate and Dold Adress in Partnership – Over 200,000 Customers to Gain Access to Comprehensive Privacy Protection

Safestate, a subsidiary of the cybersecurity company EYE World, today announces a strategic partnership with Dold Adress – one of Sweden's fastest-growing companies in the field of de-indexing. The collaboration means the parties will jointly reach over 200,000 existing and potential customers, with the goal of offering one of the market's most powerful protections against digital exposure.

Dold Adress is rapidly expanding with thousands of new customers every month – customers who will now also gain access to Safestate's advanced Dark Web Monitoring via an integrated API. The service is based on EYE World's technology, whose threat intelligence platform provides the data foundation that Safestate packages and distributes. This is a clear synergy that has emerged following EYE's acquisition of Safestate and is now being commercialized on a large scale through the partnership with Dold Adress.

"We see a strong market demand for solutions that not only identify threats – but also address them. Together with Dold Adress, we can offer a unique combination that both tracks leaked information across the internet and helps users remove their online visibility. This partnership strengthens our shared vision of truly protecting digital privacy," says Daniel Fyhr, CEO of Safestate.

By mutually reselling each other's services and combining de-indexing with deep threat analysis, Safestate and Dold Adress are taking a joint step towards making digital privacy accessible to a broad audience in Sweden – and soon also internationally.
