# Press release

EYEON GROUP AB (publ): EyeonGroup launches comprehensive Cybersecurity Solution for B2B

# EYEON GROUP AB (publ): EyeonGroup launches comprehensive Cybersecurity Solution for B2B

**EyeonGroup is making a significant move to enhance the security of its business customers by launching a packaged B2B service that combines EyeonGroup's existing B2B Enterprise service with additional security-focused features. The new package includes Secure WiFi (VPN), Cybersecurity Advisory Services, and Cybersecurity Insurance, making it easier for businesses to protect their operations against digital threats. With this package, the existing B2B service becomes an accessible and cost-effective all-in-one solution for corporate clients.**

## The New Service Package:

- **B2B Enterprise Service:**  
EyeonGroup's existing B2B service continuously monitors a company's domains for data breaches on an aggregated level, providing insight into a business's risk exposure online.
- **Secure WiFi (VPN):**  
A user-friendly VPN service that protects corporate data and ensures encrypted communication, both in-office and during remote work.
- **Cybersecurity Advisory Services:**  
Access to experts offering tailored analyses and strategies to reduce vulnerabilities and strengthen the company's cybersecurity posture.
- **Cybersecurity Insurance:**  
A protection solution providing financial coverage against cyberattacks, data breaches, or other security incidents, minimizing potential business losses.

The packaged service is designed to meet the needs of small and medium-sized enterprises (SMEs), which often lack the resources to handle complex security challenges, at a price of just SEK 79 per employee per month. By bundling these services into one package, EyeonGroup makes it both cost-effective and simple for companies to gain comprehensive protection.

*"The digital landscape is evolving rapidly, and threats to businesses are becoming increasingly sophisticated. With our new packaged solution, companies can secure their communication, receive expert cybersecurity support, and protect themselves financially from the impact of cyberattacks – all from a single provider,"* says Fredrik Björklund, CEO of Eyeon Group AB.
