

AAC Clyde Space provides financial guidance for 2026

AAC Clyde Space provides the following financial guidance for the full year 2026:

- Net sales: SEK 440-510 M
- EBITDA margin: approximately 10 percent
- Cash flow from operating activities: positive

At the end of March, the company received its largest order to date, which increased the order backlog to approximately SEK 1.1 billion as of 31 March 2026. This order backlog together with a strong order pipeline is the fundament for this guidance.

In 2026, growth is expected to be driven primarily by Products & Missions, supported by both the underlying business and the EPS-Sterna programme. Data & Services is also expected to continue to grow during the year, with the data business continuing to develop positively.

Given the type of projects in the backlog, the company's growth will be realised during the remainder of the year.

"We are in a stronger position with a strengthened financial standing, a large order backlog and increasing demand for data and information from space. In 2026, we continue to invest in expanding our data business and building capacity for future growth. We look forward to bringing more satellites into operation later this year and next year," says Luis Gomes, CEO of AAC Clyde Space.

Invitation to webcast

AAC Clyde Space will host a webcast for investors and analysts today, 28 April at 11.00 CEST, where CEO Luis Gomes will present the guidance and answer questions.

Watch the webcast here: <https://youtube.com/live/GrzY1pvFn0g?feature=share>

A recording will be available after the event.
