

Safestate Group AB (publ): SafeState Signs Long-Term Global Partnership Agreement with Monarx

Leading hosting & registrar security company chooses SafeState's Dark Web Monitoring for its network, reaching millions of end users

Stockholm, 26 August 2026. SafeState Group AB (publ) today announces that it has signed a long-term partnership agreement with Monarx, a leading web-server and website security vendor serving the hosting and registrar industry. Under the agreement, Monarx will integrate SafeState's Dark Web Monitoring data and product into its own offerings and distribute Dark Web Monitoring through its partners.

The agreement builds on a collaboration that is already delivering. Monarx has signed multiple new partnerships for Dark Web Monitoring, and the rollout with the first set of partners is already underway. With Monarx's network, we are able to access millions of end users and one of the strongest partner networks in the industry.

Monarx has chosen SafeState as its primary provider for Dark Web Monitoring, trusting SafeState's technology and data to serve its biggest partners and customers.

Daan Donders, CEO of SafeState: *"Monarx knows the hosting industry better than anyone, and they chose our technology to serve their biggest partners and customers. The first rollouts are already underway and more partnerships are signed. Now it's about scaling, partner by partner."*

Luke Langford, CEO of Monarx: *"Our hosting and registrar partners look to Monarx for the best security products that enable their own end-customers to be protected from the myriad threats they face in the age of AI. By partnering with SafeState, Monarx can offer its partners and their customers one of the*

safestate

largest and best data sets for dark web monitoring. This offering, which is easy to integrate and sell, will provide instant value and help warn millions of businesses and individuals around the world of the threats they face, helping prevent account takeovers and other unwanted intrusions. And it will drive meaningful revenue for our hosting and registrar partners."

SafeState's Dark Web Monitoring is built on one of the world's largest breach databases, maintained by SafeState's own breach data sourcing team. At onboarding, every customer receives a full historical scan of previously exposed data, followed by real-time alerts whenever their information appears in new breaches.
