

Move About launches two new car sharing locations in Stockholm together with Svenska Bostäder and Familjebostäder

Now it's even easier to move emission free in Stockholm. In collaboration with Svenska Bostäder and Familjebostäder, Move About is establishing two new electric car sharing locations in the areas Blackeberg and Hägersten. The cars are available for bookings in the Move About app.

Move About recently launched its eighth and ninth electric car sharing location in the Stockholm area. The two separate establishments take place in collaboration with the public housing companies Svenska Bostäder and Familjebostäder.

The first location consists of two Nissan Leaf (62 kWh) and is being launched in collaboration with Familjebostäder. The cars are located next to the 99 newly produced rental apartments in the 'Banken' quarter and can be found at Inteckningsvägen 112 in Hägersten.

- We invest heavily in mobility solutions that make it easier for our tenants to live life without having to own a car themselves. It is about building more bicycle parking spaces, the possibility to repair your own bicycle, access to shared cars and bicycles. We welcome our sixth car sharing station in Hägerstensåsen. In this location, there are only pure electric cars, which is completely in line with our climate and environmental thinking, says Johan Eklöf, vehicle coordinator, Familjebostäder.

The second station is adjacent to the 95 newly produced rental apartments at the 'Greken' quarter in Blackeberg. The location is launched in collaboration with Svenska Bostäder and the two cars can be found at Holbergsgatan 156.

Saves space and reduces emissions

Car sharing has become a popular addition for housing companies and property developers who work actively with environmental- and climate issues, both in new production and existing stocks. In addition to the obvious climate benefit, a shared car replaces approximately 10–15 privately owned cars. This frees up many square meters which can instead be used for more housing or social spaces.

- Electric car sharing has proven to be a successful concept for housing companies and property developers — as space is freed up and carbon dioxide emissions are reduced. A win-win, says Peter Aldby, Country Manager at Move About Sweden.

Sweden's largest network of shared electric cars

In the Move About app, you not only get access to the cars at your place of residence, but you get access to Sweden's largest network of shared electric cars. This means that tenants can also book a car in all of Move About's public car sharing locations in Sweden — in the same app.

- That residents gain access to our entire public fleet means that they can book electric cars just as easily in other cities as well, concludes Peter Aldby, Country Manager, Move About Sweden.

About Move About Group AB

Move About offers app-based, environmentally friendly and cost-effective mobility solutions to individuals, companies, municipalities and organizations. The company has developed and owns all intellectual property rights to the cloud-based green tech platform that provides digital access to electric cars, electric bicycles, taxis, subway and parking, all through the same app – around the clock. Every kilometer that the user travels with the electric cars via the platform, CO2 reduces emissions. The Company's comprehensive mobility solutions are based on the Move About app, which gives the user access to the Company's pools of electric cars, bicycles and scooters. Move About also helps companies, municipalities and organizations optimize their fleets by tailoring mobility solutions to their needs. Move About was founded in Oslo, Norway, in 2007 and today has over 5,8,500 users on its platform and over 8,30 electric cars in the company's vehicle fleet with a presence in Sweden, Norway and Germany.
