UNIBAP: Order from Contec Space Optics

Unibap has received an order for its iX10 solution valued at 1.1 MEUR for a smaller constellation from the South Korean payload provider Contec Space Optics (CSO). The order consists of Unibap® iX10 hardware, first year annual software licenses and services to be delivered during 2025. The order is pending export license approval from the Swedish authorities.

- The fact that CSO moved directly to a constellation order without prior qualification project is a testament to the work we did during 2023 and 2024 to earn customers' trust, even though we do not expect this to be the normal case yet. CSO will integrate Unibap's edge computers with advanced space optics and communication modules, and then deliver the complete payload to the eventual satellite integrator. This is also an important first order from the Korean market, showing that our expanded sales coverage is bearing fruit.

- Johan Åman, CEO, Unibap

- This collaboration with Unibap marks a pivotal advancement in our mission to deliver cutting-edge satellite payload solutions to the global market. By seamlessly integrating Unibap's state-of-the-art iX10 edge computing technology with CSO's proprietary high-resolution space camera, we are providing satellite integrators with a fully integrated, next-generation camera system. This project not only underscores the increasing recognition of CSO's technical expertise on a global scale but also reflects the success of our strategic expansion efforts and the rising demand for innovative and high-performance satellite systems."

- Youngwan Choi, CEO, Contec Space Optics

UNIBAP

About Unibap

Unibap is a high-tech company offering advanced solutions for Edge Computing and Cloud Computing in space. Our SpaceCloud® offering consists of hardware, software and services that transform the space industry by establishing a new standard for AI and cloud solutions in satellites.

The company's Quality Management System is certified according to SS-EN ISO 9001:2015. The company is listed at Nasdaq First North Growth Market.

About Contec Space Optics

CSO (Contec Space Optics), a pioneer in ultra-high-resolution Earth observation camera development, excels in the design, integration, and delivery of advanced optical payloads for surveillance, reconnaissance, and Earth observation missions. As a trusted advanced camera system provider, CSO harnesses its deep expertise in optics, assembly, and testing to enable cutting-edge satellite capabilities. Partnering with global leaders such as Unibap, CSO integrates the latest advancements in space technology to meet the dynamic needs of an evolving market and set new standards for innovation and performance.
