

Press release 2020-10-06

Fredrik Bruhn leaves the position as CEO and takes on the role of the company's Chief Evangelist in digital transformation

Unibap's CEO and co-founder Fredrik Bruhn will leave his position as CEO in order to focus on strategic collaborations in space and industry.

Unibap has seen a growing interest in the company's SpaceCloud solutions and will soon deliver the onboard computer solution to NASA's HYTI satellite mission. Since the beginning of 2020, we have also worked on refining our SpaceCloud framework together with the European Space Agency (ESA). These two projects have laid the foundation for us to be able to build a digital ecosystem around SpaceCloud. As we have a global customer base, Fredrik's unique competence and experience in AI, digitalization and avionics is crucial for large-scale collaborations in both industry and space.

- My five years as CEO have been extremely educational and I am proud over where my team and myself have taken the company. We have done the journey from idea, stock market listing and flying computers in space, to the point where we are today. I look forward to working with the new CEO and the entire Unibap team to realize my vision of taking the cloud to space and to really create space history. The sky is not the limit so lets go, says Fredrik Bruhn

- The corporate board supports Fredrik's decision to leave the position of CEO and it is absolutely the right thing for the company that Fredrik can focus one hundred percent on space, digitalization and to enable new business models for our customers. Fredrik will also continue to have a very central role in the company and will also remain as a director on the corporate board, says Hans Enocson, Chairman of the Board of Unibap.

Fredrik Bruhn will remain as CEO until a new CEO is recruited and in place.
