

Wyld Networks and HyperThings announce partnership to deploy satellite IoT solutions in the Middle East and India

Wyld Networks today announce an agreement with HyperThings to deploy satellite IoT solutions in the Middle East and India.

HyperThings™ is an innovative provider of “Internet of Things” based products and solutions for Smart City and Industrial domains with a core focus on LPWAN based connectivity. HyperThings has offices in the Middle East and India and has established business relationships with companies such as Bosch, SAP and HP.

Wyld Connect is a sensor to satellite IoT technology developed by Wyld Networks that enables data to be cost-effectively collected anywhere in the world in areas where there is no cellular wireless coverage.

“We are excited to be working with HyperThings in rolling out satellite IoT solutions in the region. HyperThings have extensive expertise in deploying IoT solutions and have established commercial relationships with companies that have requirements for IoT connectivity to improve their operational efficiency,” said Alastair Williamson, CEO of Wyld Networks.

“At HyperThings we provide IoT Consulting, IoT Products and Modules, IoT Industry Solutions, Cloud and Analytics Solutions and Product Engineering to our customers with a focus on terrestrial LPWAN connectivity. In working with Wyld Networks, we can now meet the demands of our customers to extend our offer to include satellite IoT connectivity, providing them with global coverage” said Awdesh Chetal, CEO of HyperThings.
