Medclair AB (publ)

Medclair: New Distributor in the USA

Medclair has entered into a partnership with Apex Medical Gas Systems, which will now become the official distributor for the U.S. market.

Apex Medical Gas Systems, based in Oklahoma City, has extensive experience with medical gas systems and a nationwide network to distribute Medclair's solutions. With an experienced service team and strong relationships with hospitals, Apex facilitates the procurement process and the implementation of Medclair's technology in hospitals and clinics across the U.S.

The U.S. is one of Medclair's key focus markets, with a large healthcare sector facing increasing demands for sustainability and reduced emissions. This partnership strengthens Medclair's presence in the U.S. market and creates the best conditions for the company's growth.

Jonas Lundh
CEO
Medclair AB

Medclair is a Swedish green-tech provider and a leader in the safe and environmentally friendly destruction of nitrous oxide. With operations in twenty countries, Medclair offers innovative solutions that significantly reduce the climate impact of nitrous oxide while simultaneously improving the working environment.

The company is listed on NGM Nordic SME. More information about Medclair can be found at www.medclair.com
