Significant events during the quarter

- Dicot Pharma met the listing requirements for Nasdaq First North Growth Market Sweden in October, and first day of trading on the new marketplace was November 7.
- All relevant authorities gave Dicot Pharma approval in October to start the phase 2a clinical trial in Sweden, Denmark, and the Netherlands. In November, the first participants were dosed. The study started according to schedule, with the clinical part expected to last until mid-2025, followed by statistical analysis before results can be reported.
- The US Patent and Trademark Office issued in October Notice of Allowance for three patent applications, and in November and December, these additional patents were granted in the US for the erectile dysfunction drug candidate LIB-01. The patent family strengthens both product and method protection until 2042 and includes “Composition of Matter”.
- In-depth clinical results from the phase 1 study were presented at the largest US conference in sexual medicine. The results were later published in The Journal of Sexual Medicine and has been selected for presentation at the European Society for Sexual Medicine’s annual congress in February 2025.

Significant events after the quarter

- Early February, more than half of the 140 participants in the ongoing phase 2a study have been dosed. The recruitment rate is high and on schedule. The study is expected to be reported in mid-2025.
