Satellogic orders space data processing and imaging components

Satellogic S.A., a premier supplier of precision agriculture information solutions based on high-resolution hyperspectral space based sensors has placed a follow-on order of advanced onboard data processing and imaging components from Unibap for \$243,360 USD.

Delivery of the products will be staged during end of 2017 and first half of 2018.

- Our customer's choice to continue with technology from our SpaceCloud line of business for the manufacturing of additional spacecraft is greatly encouraging. Satellogic is operating and evolving a very advanced satellite constellation which we are very proud to support, said Unibap's CEO Dr. Fredrik Bruhn.
