

# Gapwaves receives a follow-up order from current American autotech customer

In June 2022 the American Autotech company ordered their first project of radar antenna development, with intended use in autonomous vehicles. The customer now has placed a follow-up order for additional prototypes that are expected to be delivered in January 2023. The order value is approximately KSEK 250.

“We see good momentum in this project and regardless the smaller order value of this follow-up order, the continuation of the collaboration is important and we are excited to be a part of the journey ahead together with this provider of autonomus vehicles”, comments Jonas Ehinger, CEO of Gapwaves.
