

# Autocirc acquires Bärgrningstjänsten Sverige AB

November 8 2023

*Autocirc acquires Bärgrningstjänsten Sverige AB. The company is based in Gothenburg and is a prominent player in the towing of both light and heavy vehicles. This is a strategically important strengthening of Autocirc's value chain, where specialised companies in the auto parts industry collaborate to increase the reuse of car parts.*

Bärgrningstjänsten Sverige has a strong position in its market and established collaborations with, among others, the police, rescue services and several insurance companies. Their expertise in roadside assistance, salvage and transport of vehicles and machines will be an important asset for Autocirc.

**Johan Livered, CEO Autocirc, says:**

- Reliable transport and recovery services are essential to our business. Bärgrningstjänsten Sverige will play a central role in Autocirc's infrastructure and help ensure that vehicles reach our workshops and dismantling facilities quickly and safely. We are very proud of this acquisition and look forward to our co-operation.

**Marcus Gustavsson, CEO Bärgrningstjänsten Sverige, concludes:**

- This is an important and inspiring step for us. We see great potential in Autocirc's business model and their ambition for the future. Our services now become part of a value chain where they have a greater impact and can make a difference for a more sustainable auto parts industry.

Bärgrningstjänsten Sverige is Autocirc's fifth acquisition in the business area of car transport and salvage. The deal contributes to a more complete infrastructure for efficient reuse and recycling of vehicle parts, with a reduced climate footprint as a result.

**About Autocirc**

Autocirc works for a circular transition in the automotive industry. We ensure that used car parts get back on the road again - or that materials and components can be used in completely different products and contexts. By moving from new production to reuse, remanufacturing, repurpose and recycling of car parts, we are making the second-hand market the first choice. A sustainable choice for a smarter automotive industry and a better alternative, also for the next generation.

Autocirc was founded in 2019 and is growing rapidly. Today, the group consists of close to 60 companies with over 900 employees and operates in Sweden, Norway, Finland, the UK, Poland, Germany and France.
