

Free2move establishes sales office in Asia

(F2M MTF)

The office, which already has started its activities, is located in Kuala Lumpur, Malaysia.

The office will manage all sales activities for the Asia Pacific region. It will furthermore provide production support to the independent contract manufacturer, Stride Electronics.

"It is with great pleasure that we can announce the next step in Free2move's development. The establishment means that a direct and close relationship will be established with customers working in the same time zones. Support will be provided in Chinese and Bahasa when needed. We expect that the sales office will drive sales, establish new customer relationships and open up new geographies, says the company's CEO, Anders J Johansson".
