

Announcement

SMART VALOR AG, Switzerland

7 March 2023

SMART VALOR adds crypto tokens OP to its platform

Digital asset exchange SMART VALOR announces the addition of the native token Optimism on its platform. Both projects aim to improve the performance of blockchains and contribute to the adoption of the technology.

Optimism: making Ethereum faster

Optimism aims to address Ethereum's scalability problems. As a so-called Layer 2 solution, it conducts transactions outside the Ethereum blockchain, which makes transactions much faster and cheaper. For developers, Optimism is very attractive as they can easily build apps on the Layer 2 network. The increasing popularity is reflected also in the price performance of its native token OP: Since the beginning of the year, the price has increased by more than 300%.

Currently, the OP price is **\$2.43 USD** with a 24-hour trading volume of \$210,603,380 (as of 7 March) and the market capitalisation is around \$691 million. This ranks the token 67th on the list of all cryptocurrencies.

Funding and trading live

Funding and trading on the SMART VALOR platform are already live. Both tokens are tradeable against EUR, CHF, GBP, USD and SEK and the crypto currencies Bitcoin (BTC), Ethereum (ETH), Tether (USDT).

For more information, please see our blog posts on Optimism. ((Links!))

About SMART VALOR

SMART VALOR is a Swiss company that became the first European digital asset exchange listed on Nasdaq First North. The company's mission is to provide a trusted gateway to blockchain technology for investors and institutions. On the B2C side, it operates a retail

digital asset exchange, custody, and asset management. On the B2B side, the company works with banks and fintech companies offering its technology as a white-label Crypto-as-a-Service solution. SMART VALOR was one of the first crypto companies to receive financial intermediary status in Switzerland and to be registered as an exchange and token custodian under the Blockchain Act of Liechtenstein.
