EEVIA HEALTH PLC RECEIVES A 763 KSEK (69 KEUR) SALES ORDER FOR FENO-SAMBUCUS™ 7 ORGANIC

Eevia Health ("Eevia" or "The Company") received a 763 kSEK / 69 kEUR sales order for the elderberry extract FENO-SAMBUCUS™ 7 ORGANIC from a distributor in the US.

The order is from Select Ingredients, a distributor located in San Diego, California, US. Select Ingredients is a specialist in organic ingredients and high-quality natural plant extracts, serving branded customers in the Golden State and other large states in the US.

The order end customer is a company in the whole foods and drinks segment, which is experiencing very fast growth across North America.

This order is the first order in a new supply-chain concept that Eevia Health has developed, which includes sea freight to a forward warehouse in New Jersey, USA. Hence, the customer will not pick up with FCA terms from Finland but will pick up FOB (Free on Board) from New Jersey, USA. Through this new supply-chain arrangement, Eevia will save freight costs compared to air freight. Eevia will hold buffer stock in the US for short lead times to customers in this territory.

"We are happy to do the "maiden shipment" under this new supply-chain arrangement. We believe keeping buffer stock in the US with ready imported materials with all certificates issued including the USDA NOP certificate for organic products, will provide better customer service and improved ability to serve smaller orders." says Anna-Maija Vanhatalo, Customer Service Manager, Eevia Health Plc.

This is a repeat order from the end customers. Eevia expects further repeat orders in the future.

INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients in dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product, Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. Manufacturing natural ingredients near the raw material harvest areas, Eevia offers a short value chain with an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name (ticker) [EEVIA](#).
