

Meltron receives new order from Helen Oy for power plant

Meltron has received a new order for its market leading PLS, sealed LED lights and the Pylon LED lights from Helen Oy, the Helsinki energy provider. The order value exceeds 40 k€.

The luminaires will be installed in the refurbished Vuosaari power plant in Helsinki. Helen Oy has previously installed Meltron luminaires in two other locations and continues to deploy the Meltron luminaires in a new plant.

- “It is reassuring to see very demanding customers that have previously installed and experienced our luminaries come back to order more”, says Ville Sistonen, CEO at Meltron AB. “Last summer we delivered luminaries to a nuclear power plant, the quality and performance of our luminaires speak for themselves and our customers understand the value we deliver.”

Meltron PLS is specifically designed to operate in harsh environments where chemicals, dust, dirt, water, and corrosive substances are tough, making it the most advanced lighting solution for agriculture, food processing, chemical industries and other similar challenging conditions. It provides a very high luminous flux, while consuming very little energy.

Meltron PYL is optimized for use in high spaces. Variable beam angles provide for wide and even light distribution to illuminate large areas while minimizing the number of fixtures needed. The PYL modules require very little maintenance, thus creating an extremely efficient and cost-effective area lighting system with low life-cycle costs.

About Meltron – “More than Just Light”

Meltron AB designs, manufactures and sells LED lighting solutions which are based on interdisciplinary application of electronics, optics, thermodynamics and nano-structures. “More Than Just Light” translates into energy savings, superior light quality, product life-time savings, increased productivity, safety and wellbeing. Meltron provides high quality solutions for the most demanding environments in infrastructure, industry, logistics and agriculture.

LED lighting is one of the fastest growing major industries of the world. The annual growth of the industrial sector currently amounts to 47 percent, and the entire market is projected to generate turnover of USD 100 billion in 2020, according to Edison Research.

*Meltron's share is traded on NGM Nordic MTF under the ticker **MLTR**.*
