EYE World AB (publ): World Leader in Leaked Data and Proactive Protection

# EYE World AB (publ): World Leader in Leaked Data and Proactive Protection

Since its founding in 2015, EYE World AB (publ) has, for more than a decade, collected and built one of the world's most extensive databases of leaked and hacked information. The scale of this dataset and our technology make us unique in the market – providing our partners with a tangible competitive advantage.

Our database includes:

- Over 54 billion hacked accounts
- More than 778 billion leaked records
- Proprietary AI that identifies and categorizes data (personal ID numbers, credit cards, passwords, names, addresses)
- PCI certification enabling secure storage of financial information such as credit cards, bank accounts, and IBANs

Automated real-time protection: Every time we upload a new leak, our AI immediately analyzes and categorizes it – and automatically sends real-time alerts to our channel partners' end customers, enabling them to act swiftly and limit potential damage.

*"This is the foundation of our entire company. Our database gives us a unique position in the market and the ability to deliver data that no one else can match,"* says Fredrik Björklund, CEO of EYE World.

Today, EYE World collaborates with leading organizations worldwide – with a clear mission: to be the first choice for organizations seeking to protect their customers against modern cyber threats on a global scale.

## About EYE World

Eye World AB (publ) (<https://eye.world>), founded in 2015, is one of Northern Europe's leading and fastest-growing providers of SaaS solutions in Cyber Security. We are your complete partner and One Stop Shop for digital security, offering a unique AppStore that brings together 13 powerful services under one roof. Our partners can easily select the solutions that fit their business model and seamlessly offer them to their end customers.

Eye World delivers innovative business solutions in IT security, privacy protection, and advanced AI-based data solutions. Our products are specifically designed for the B2B market, with a focus on demanding industries such as banking and finance, insurance, telecom, and hosting. We help companies across Europe protect their digital assets and stay ahead of cyber threats-today and in the future.
