

Move Abouts German subsidiary mobileeee wins another two significant contracts

Following our successful win of more than 20 cars in the Emsland region of northern Germany in May, mobileeee today was awarded the public tender for 6 electric cars in the nearby Bentheim region. The municipality is providing a car sharing service for both internal use as well as to public users. Soon we will see Corporates and Administrations following and extending our offer in these regions.

Furthermore, we are happy to announce the start of a very special corporate sharing project together with the airline Condor at Frankfurt Airport: from now on their flight crews can make use of electric cars (type MG-5) to shuttle to (and from) their flights at terminal 1 of Frankfurt Airport. We created a tailor-made sharing product for this specific user group of which we hope it is just the beginning of a range of sustainable (ground) mobility services mobileeee provides for this progressive airline.

“Altogether, the Emsland, Bentheim and Condor contract will deploy 50 electric vehicles at the start of service which is in line with the overall strategy of targeting the business-to-business segment of the Move About Group. These contracts reduce our risk without compromising future upside”, says Michael Lindhof, CEO of mobileeee.

About Move About Group AB

Move About offers app-based, environmentally friendly, and cost-effective mobility solutions to private individuals as well as companies, municipalities, and organizations. The company has developed and owns all intellectual property rights to its cloud-based Greentech platform that provides digital access to electric cars, electric bicycles, taxis, metro, and parking via one and the same app - around the clock. Every kilometre that the user travels with the electric cars through the platform reduces CO2 emissions. The Company's comprehensive mobility solution is based on the Move About app, which gives the user access to the Company's pools of electric cars, electric bikes, and electric scooters. Move About also helps companies, municipalities and organizations optimize their vehicle fleets by tailoring mobility solutions to their needs. Move About was founded in Oslo, Norway in 2007 and today has over 70,000 users on its platform and over 800 electric cars in its fleet with a presence in Sweden, Norway, and Germany.
