

SDS receives order, valued SEK 1.3 million, from a leading mobile operator in North Africa

The order, valued SEK 1.3 million, has been received from an existing customer that came with the acquisition of eServGlobal in June 2019. The customer is a leading mobile operator in North Africa and the order includes the deployment of the Active-Active feature as part of a platform enhancement as well as a platform swap from PayMobile to SDS' flagship product, ERS 360°.

"The order has been received from one of the biggest customers of eServGlobal and is a testament of the trust they have in us as they move from a legacy platform to our flagship product, ERS 360°. The migration coupled with the Active-Active feature will allow the operator to improve their operational performance ensuring zero downtime for critical services", says Tommy Eriksson, CEO SDS AB.

The customer is migrating to SDS' flagship transaction platform, ERS 360°, which allows for additional growth features to be added later from SDS' solution suite. The migration is expected to help the customer achieve operational excellence for sales and distribution. The additional functionality of Active-Active is a business continuity solution and allows for a multi-cluster setup to be established. This means that the traffic coming into the system is balanced between the two primary and disaster recovery sites ensuring high availability of the services.

This order is a significant step in continuing the long-term relationship and collaboration with the customer. The contract also includes support orders that will be received over the next three years. Revenue from this order is expected to be recognized in the third quarter 2020.
