

AAC Clyde Space wins SEK 7.1 M order

2024-08-22 AAC Clyde Space AB (publ)

AAC Clyde Space has won a USD 0.69 M (approx. SEK 7.1 M) order for reaction wheels to be used on a number of small satellites. The order comes from a US blue chip company and follows an order received in February 2023 on the same type of equipment.

The order includes flight and engineering models as well as flight testing of reaction wheels. Reaction wheels are primarily used for three-axis attitude control, providing high pointing accuracy and enabling spacecrafts to rotate to keep payloads in correct angle.

AAC Clyde Space expects to have completed delivery of the order during the fourth quarter 2025.
