*Vilhelmina Mineral is a Swedish junior resource company with focus on copper and zinc projects in the Nordic countries. In Sweden the Company owns the Stekenjokk project in which approximately 7 million tons were produced between 1976 and 1988. According to estimates there are remaining indicated mineral resources of 7.4 million tons with grades of 1.17% Cu, 3.01% Zn and 47 g/ton Ag (cut-off 0.9% Cu). In Norway, Vilhelmina Mineral is co-owner in the Joma field in which some 11.5 million tons were previously produced between 1972 and 1998 with average grades of 1.5% Cu and 1.5% Zn. The Joma field (excluding Gjersvik) is estimated to hold approximately 5.7 million tons with grades of 1.55% Cu and 0.82% Zn (cut-off 0.8% Cu).*
