# Unibap receives order for software and processing hardware to a satellite mission

**Unibap AB (publ) has received an order for a spaceflight solution to a satellite mission from a large European space company. Unibap will deliver software and data processing unit for flight based on its SpaceCloud product line, together with engineering support and development products. The order value is 350 kEUR and will be delivered during second half of 2022.**

The satellite mission will utilize Unibap's software framework as a platform for testing of new capabilities.

- I am enthusiastic to make this announcement as it represents a significant entry into the European space market and advancement from previous evaluation programs into spaceflight programs. We can now see the benefits as our solution is proven in space and truly offer competitive advantage in the space market. Our customers can leverage on the growing ecosystem of software and solutions, says Lena W Jansson, CEO at Unibap.
