

## ÅAC Microtec's subsidiary Clyde Space certified according to ISO 9001:2015

2018-04-09 ÅAC Microtec AB

**ÅAC's subsidiary Clyde Space Quality Management Process for design and manufacturing of satellite platforms and avionics subsystems has been certified according to ISO 9001:2015**

The Company's quality control policy is a result of extensive experience in the design and manufacture of small satellite subsystems. It operates a strict quality control system throughout its business. The technical review process ensures that all new hardware or software developments, without exception, are subject to a strict peer review process at key project milestones. Furthermore, all manufacturing and test areas are fully ESD controlled and strictly monitored, and the Company's assembly and inspection staff are trained to ESA standard. This approach has been proven through numerous successful spacecraft missions and zero reported failures of its mission deployed products.

- *This certification is an evidence that we have good processes in place to meet and try to outperform our customers' expectations, says Alfonso Barreiro, CEO*

The ISO 9001: 2015 certification was issued by BSI UK, which conducted an independent, third-party audit of the Quality Management Process for design and manufacturing of satellite platforms and avionics subsystems. Clyde Space was previously certified according to ISO9001:2008.
