

## Press release

### **H&D Wireless awarded three pre-production orders on IoT-modules**

[Kista, Sweden, 8<sup>th</sup> June, 2018.]. **H&D Wireless, Swedish leading supplier of IoT Connectivity Modules and IoT + RTLS Cloud Platform solutions to the Industry, is awarded three pre-production orders on the SPB228 WLAN+ Bluetooth Combo module on same week. Total value is \$15,000.**

The Customers are based in Northern Europe and focus on providing Computer-on-modules for industrial computer system.

“We are happy to have received several pre-production orders on SPB228 in a short time, it demonstrates that the modules we offer drastically reduces the time from prototype to volume production”. said Pär Bergsten, CEO and founder of H&D Wireless.

H&D proudly announce 14 “design-ins” up-to-date (the step before volume production) of SPB228, an increase from 2 in January 2018.

Europe is dominating the industrial PC market that is growing with over 10% CAGR (source: TMR Analysis). The market for Industrial IoT is growing sharply, estimated to be worth \$225 billion, 2022 (Markets & Markets Research).

#### **With the SPB228 developers are targeting a wide range of applications;**

- High performance and secure industrial control and monitor systems
- Consumer electronic such as gaming and mobile computing
- High performance Smart Home systems; video, audio and security

The module integrates all functions for a WLAN 2x2 MU-MIMO, dual-band and Bluetooth 5 ready for Linux platforms. Form factor M.2, low power, FCC, IC and CE certified.
