

ACD places new order with H&D Digital Twin Industries worth 3.1 MSEK

H&D Digital Twin Industries AB (HDT) has received a new order from ACD Elektronik GmbH for continued support and delivery of IoT modules. The order value is approximately 3.1 MSEK.

ACD Elektronik GmbH is a European manufacturer of portable terminals for industry and logistics, as well as inventory control within the food retail sector.

This new order of approximately 3.1 MSEK has been obtained under the new framework agreement and is expected to be delivered during the second half of 2026. It is anticipated to impact cash flow positively during the autumn of 2026 and the spring of 2027.

The framework agreement, which spans a 5-year period, is estimated to be worth approximately 14 MSEK in revenue for HDT and includes both the delivery of IoT modules and prioritized R&D support.
