

New Studio Partner

ELYSIUM

STUDIOS

POWERED BY
RELA::

Relax Gaming, the igaming aggregator and supplier of unique content, has today announced ELYSIUM Studios as the latest addition to its market leading distribution programme, Powered By Relax.

The Stockholm-based supplier has garnered a strong reputation for itself in a short space of time, having become known for its portfolio of well-designed games inspired by video and social games.

In addition to having a strong focus on quality over quantity and developing eye-catching games with engaging bonus features and mechanics, ELYSIUM also operates its own Remote Gaming Server.

Under the agreement, a selection of ELYSIUM Studios' top performing titles including *Battle of Myths*, *Wizardz World* and *Spirit Hunters* will be made available to Relax Gaming's extensive distribution network featuring leading operators in key regulated markets.

Commenting on the deal Simon Hammon, Relax Gaming CEO, said: "ELYSIUM is a truly stellar studio with an impressive portfolio of titles under its belt. Their games thoroughly impressed us thanks to their distinct art style and impressive bonus features that encourage players to take action and engage with the game unlike anything we've seen before. We're delighted to welcome them to the Powered By Relax family"

Sergio Jacob, CEO of ELYSIUM Studios AB, said: "The team from Relax have been fantastic from day one, we're grateful for this opportunity and for the partnership which will take ELYSIUM to the next level in its expansion journey. We're excited to share our highly engaging games with the industry and keep pushing the boundaries of innovation."

"I'm very proud of the ELYSIUM team who have done an excellent job in producing and delivering exceptional games. In today's market, with so many providers and developers in this sector, it's not a matter of how many games you release each month, but it's the engagement of games and the quality you bring to the table that will prevail."

Established as one of the industry's leading B2B suppliers, Relax Gaming was recently named the Best Mobile Gaming Software Provider at the prestigious EGR B2B Awards and the Best Game Provider at the AskGamblers Awards. On top of that, the company has consistently enjoyed myriad other industry awards and nominations this year.

In total, Relax Gaming provides more than 4,000 online casino games, from its high-performing proprietary slots to a significant, varied library of content from hand-picked third-party studios via its partnership programmes.
