

Press release

H & D Wireless receives volume order from Tier 1 customer for module to Internet streaming Radio

[Stockholm, Sweden, December 19th, 2017.]. **H&D Wireless, leading Swedish supplier of IoT, Cloud and Platform solutions, receives an order for wireless modules and will assist in designing the HDG205 System In Package (SIP) module to their IP-radio. This marks a continued trust in H&D Wireless who has been supplying previous generation modules since 2014.**

H&D Wireless is providing the HDG205 Wi-Fi SIP module including design services and support to the assigned ODM, TQ Group. The order is another indication that H&D Wireless is becoming a leader for wireless connectivity within the European market for Internet of Things, IoT. The HDG205 Wi-Fi b/g/n low cost SIP module with its small size (8x8mm) and high bandwidth is optimized for demanding applications such as streaming video and audio within industry and home.

Initial order value is 85 KUSD (722,000 SEK) and add-on orders are expected over the next three years. "We are very proud to be selected again for this project with a European market leader for Internet driven radio technology. Working with TQ Group is ensuring shortest and safest way to final implementation and volume ramp". says Pär Bergsten, CEO, H&D Wireless.
