# First Nordic Metals välkomnar Dividends aktieägare

**Dividend Sweden har fattat ett stämmobeslut om att dela ut Depåbevis i First Nordic Metals (FNM) till våra aktieägare, med avstämningsdag 16 april.**

Vi är mycket förväntansfulla och glada över att erbjuda våra aktieägare denna spännande investering i en av de största innehavarna av svenska guldprospekteringsrättigheter, se bifogad information och videopresentationer från FNM:s CEO Taj Singh.

Vänliga hälsningar  
Bo Lindén, VD

## Welcome New Shareholders!

I hope this message finds you well. I am the CEO of First Nordic Metals Corp. (FNM) and I'm excited to introduce our company to you, one in which you are now invested in through the Dividend Sweden. FNM has recently listed on the Stockholm Nasdaq First North Growth Market under "FNMC-SDB", marking a significant milestone in its growth. The company is also listed on the Toronto Stock Exchange. FNM is a Scandinavian-focused junior mineral exploration and development company, advancing world-class gold projects. Here is why FNM currently presents a very interesting opportunity:

- ❖ **Gold price is at all-time highs of around US\$3,100 per ounce:** Many banks and economists forecast that this is the beginning of a gold bull market where gold could continue to rapidly rise.
- ❖ **FNM owns the largest development-stage gold deposit in Sweden, the Barsele project:** This is a joint venture with Agnico Eagle, one of the world's largest gold producers, adding credibility and expertise. This deposit is poised to become a mine soon, and we believe it will be one of the largest and most profitable gold mines in all of Europe.
- ❖ **Exciting New Drill Targets:** Surrounding Barsele, FNM has identified 8 highly prospective 100%-owned large-scale targets, and these are set to be drilled this year as part of a 25,000-meter drill program, one of the largest gold exploration programs in Europe. FNM believes that from these targets we will make important new gold discoveries to grow our existing resources.
- ❖ **Top-Tier Exploration Land:** FNM holds the largest exploration land package in Sweden, over 100,000 hectares, situated on a mineral-rich greenstone belt, the "Gold Line", which is considered one of the least explored major gold belts worldwide. We believe that in addition to our targets already identified we will find many more new high potential targets to be tested with drilling in the coming years.
- ❖ **Proven Management:** FNM is led by a highly experienced team with historic success in the global mining sector, committed to responsible exploration and sustainable growth.

Sweden has a long history of mining and natural resources and there is now widespread support across the nation to grow this industry. We believe Sweden will be one of the next frontiers for mineral discovery and FNM's strong project portfolio positions the company for long-term success.
