

Press release June 5, 2024

## **Unibap: Call-off order of batch #2 for major European constellation valued at 2.25MEUR**

The second batch of SpaceCloud® iX5 solutions has now been converted into a full order by the customer, worth 2.25 MEUR. Deliveries are scheduled between Q3'24 and Q1'25, demonstrating Unibap's ability to deliver volume orders of Flight Models with short lead-times.

The Authorization to Proceed (ATP) announced on March 29, 2024, for the second batch of SpaceCloud® iX5 Flight Models has now been fully committed. The customer has received approval from the commissioning European authority as stated as a requirement in the previously announced APT. This is the second out of three batches for a major European satellite constellation, for which Unibap supplies the payload data processing units.

- Today is a good day. I see this as a testament of the excellent collaboration we have with our customers. We have, for this second batch, been standing in the starting block since the previously announced ATP and are well-prepared to follow the agreed schedule for delivery. We will again demonstrate our capacity and quality to supply volume orders of high-performance edge computer solutions with short lead-times, says Johan Åman, CEO Unibap.

This call-off order is part of a larger 6.2MEUR contract that was announced on January 10<sup>th</sup>, 2023.
