

PRESS RELEASE

Stockholm 2024-01-24

## **JonDeTech has entered into a letter of intent regarding application development for Heat Flux**

**JonDeTech Sensors AB ("JonDeTech" or the "Company") has started a collaboration with Sensative AB, a leading supplier of innovative solutions for digitizing the physical world, and LifeFinder AB, a company focused on developing security solutions. With JonDeTech's proprietary JIRS30 as a base, the parties will develop an application concept in the fast-growing heat flux area.**

The project includes, among other things, developing, designing, and producing a demonstrator in combination with developing the necessary algorithms to demonstrate the heat flux functionality. The project will start immediately, and the parties aim to create applications to commercialize JIRS30 in the heat flux field. The first prototype should be ready in 2024.

- We have identified an increased interest in our proprietary sensor JIRS30's unique ability to measure heat flux. We see the collaboration with Life Finder and Sensative as an important milestone to quickly reach the market with heat flux applications and build on our fabless model with existing and new collaborations, says Leif Borg, CEO JonDeTech.
- JonDeTech provides one of the world's thinnest sensors, which can be integrated into both small and large security products. This creates extraordinary opportunities to develop new products and security solutions, says Anders Schenning, CEO of Life Finder.

### **About JonDeTech**

JonDeTech is a supplier of sensor technology. The company markets a portfolio of IR sensor elements based on proprietary nanotechnology and silicon MEMS. The nanoelements are extremely thin, built-in flexible plastic, and can be manufactured in high volumes at a low cost, which opens up for a variety of applications, such as temperature and heat flow measurements, presence detection, and gas detection. The company is listed on Nasdaq First North Growth Market. Redeye is the company's Certified Adviser. Read more at [www.jondetech.se](http://www.jondetech.se) or see how the IR sensor works at [www.youtube.com/watch?v=2vEc3dRsDq8](https://www.youtube.com/watch?v=2vEc3dRsDq8).
