

EMPLI03 FOR CHRONIC PAIN, READY FOR GMP MANUFACTURING FOR THE CLINICAL STUDY

Emplicure AB has developed the formulation of Empli03 to be used for GMP manufacturing for the first clinical study. Agreement has been signed with Quotient Sciences, UK, who will be responsible for the manufacturing and will also perform the first pharmacokinetic study.

"We have achieved one of our milestones in the development of an opioid product for treatment of chronic pain. With an even and stable release profile, and with properties that limit abuse, Empli03 can contribute to a safer medical treatment", says Torbjörn W. Larsson, CEO of Emplicure

Emplicure is a pharmaceutical company developing new and innovative drugs by combining existing and approved active substances, and advanced materials science within ceramic biomaterials. The product portfolio is focused on chronic pain, and with abuse deterrent formulations. The wholly owned subsidiary, Amplicon AB develops consumer products, with tobacco-free nicotine as the first product. Read more at www.emplicure.com
